

OneVision's automation solutions significantly ensure that our customers can create millions of products (e.g. books, signage, product labels, price tags, out-of-home advertising, magazines, etc.) without errors, in high quality and in the shortest possible production time.

You have already acquired a sound basis of software development throughout your studies or previous on-the-job experience and are looking for an exciting and challenging environment? You are a macOS/iOS developer and want to program in Objective-C on a different level?

In that case you should not hesitate to join our team as soon as possible as:

## SOFTWARE DEVELOPER PDF TECHNOLOGIES (M/F/X)

### JOB DESCRIPTION

- You are part of our "PDF" team, whose objective is the maximum digitization and automation of production and file workflows for our customers - the team develops a self-written PDF engine and provides associated high-class tools
- You will be involved in the design and development of a software universe that ensures the daily production of millions of products worldwide in the print and media industry
- Close cooperation and solution consulting with development teams at other locations, QA, Customer Support and Sales

### WHAT YOU EXPERIENCE

- Long-term perspectives
- Team and solution orientated environment
- Co-operation with well-known companies
- An open-minded and motivated team with professional and supportive colleagues
- A pleasant working atmosphere with a concise communication and decision line

### QUALIFICATIONS

- University degree in computer science, mathematics, engineering or a comparable qualification
- Sound analytical, mathematical and systematic thinking skills
- At least 3 years of professional experience in programming
- Very good knowledge of the following programming languages: C/C++ and preferably Objective-C (which could be learned)
- Not afraid of dealing with a large code base
- Enjoy working in agile development teams as well as German and very good English skills
- Experience in cross-platform development (Windows, Linux or Mac) and the basics of web development with Java Enterprise are also of advantage (but not required)

Can you identify with one or more of the above areas?

Then we look forward to receiving your application by email to [career@onevision.com](mailto:career@onevision.com) [www.onevision.com/career](http://www.onevision.com/career)
