# One Step Ahead
With OneVision

International. Competent. Future-proof.

For more than 30 years, OneVision Software has been delivering tailor-made solutions for process automation. Today, we combine our deep expertise in the printing industry with artificial intelligence and computer vision to make your production not only more efficient but also more transparent and reliable.
Over 3,000 companies worldwide, from print service providers and media houses to agencies and other industries, rely on OneVision Software. They all benefit from decisive advantages: **greater profitability, efficiency, and quality** in their processes.

Global service. Local expertise.
As a global company, the OneVision team supports its customers across multiple locations worldwide. In addition to our headquarters in Germany, we serve you through subsidiaries in the United Kingdom, France, the United States, Brazil, Singapore, and India.

Give your processes the decisive **automation boost**

Your benefits with OneVision Software

MANAGING DIRECTOR

Addressing labor shortage
With our intelligent automation solutions your employees can focus on value-adding tasks while routine work is fully automated.

Boost throughput
Process automation increases machine utilization and throughput. This makes production significantly more profitable.

PRODUCTION MANAGER

Automation by AI
Whether individual process steps, entire workflows, or AI-based quality checks: With OneVision, up to 100% of your processes can be automated.

Quality & reliability
Our technologies enable real-time monitoring and error detection. The result: maximum production reliability and consistent quality – 24/7.

WORKFLOW MANAGER

Modular & scalable
The modular structure of OneVision's software solutions adapts precisely to your needs: From file optimization and production tracking & tracing to AI-powered validation.

Data security and integrity
Your data remains fully under your control. Hosted locally, secured by 100% OneVision technology, and independent of any third-party providers.

Workflow Automation Your Way

Processing and optimization of production files – fully automated:
At the heart of OneVision lies our powerful file automation technology. Intelligent assembly lines process each file individually, applying more than 130 check criteria. Errors are detected and corrected automatically.

The results:
- An optimized production file ready for seamless downstream processing
- Custom finishing information tailored to your workflow
- A solid foundation for all further automation

FROM PREPRESS TO PRODUCTION
– and beyond

OneVision software not only **automates prepress processes** like file checking and optimizing or workflow management. With computer vision and AI, we enable: **Tracking & tracing** of production steps with insights into every station on the shop floor. **AI-based validation** software for use cases far beyond printing, e.g. verifying billboard placement and quality through automatic image comparison. **Smart integrations** with hardware and software systems.

Book / Commercial Printing
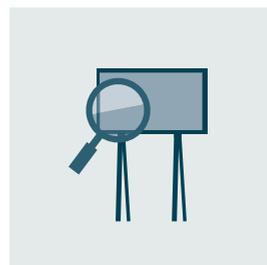

Label Printing

**Publishing Printing**

**Wide Format Printing**

In-Plant Printing

AI Image Processing

AI Quality Validation

Production Tracking & Tracing

Webshop B2B/B2C → FTP-/Web-Upload → E-Mail / USB-Stick → **File Input** → **Management Information System** (MIS) → **Jobticket** (JOB)

Finishing Information → **Imposition / Nesting** → **Normalization** → **Bleed Generation** → **Cut Line Management** → **Color Management** → **Preflight**

Printing → **Embellishing/ Finishing** → **Binning/ Shipping** → **Quality Checking** → **Installing/ Monitoring** → **Failover Reprinting** → **Invoicing**

Production Stations – Control and Tracking   **OneVisionIQ – AI Billboard Validation**

Service that makes the difference
Your success is our mission

To deliver the best solutions, we start by thoroughly understanding your workflow. Our automation experts will examine your current setup and determine where efficiency, quality, and transparency could be enhanced with OneVision software.

Workflow Audit & Proof of Concept

In a structured audit, we simulate and test automation scenarios based on your real data. You receive a working prototype of your future workflow, so you can clearly see the benefits before full implementation.

Our services at a glance

Continuous updates

For more than 30 years, OneVision software has evolved continuously. Customers receive software updates twice a year that are tailored to their requirements and the latest market developments.

Training

A comprehensive training portfolio is available on an ongoing basis. Individualized training, whether on-site or remote, will turn your team into software experts.

24/7 Support

After successful implementation, our in-house helpdesk team is available 24/7. Our workflow specialists provide direct assistance with configurations, updates, and troubleshooting at any time.

Customer portal

Direct access to the latest updates, product manuals, customer webinars, and a direct line to your OneVision contacts.
