

Ready for the future with OneVision

Software solutions for
automating workflows

www.onevision.com

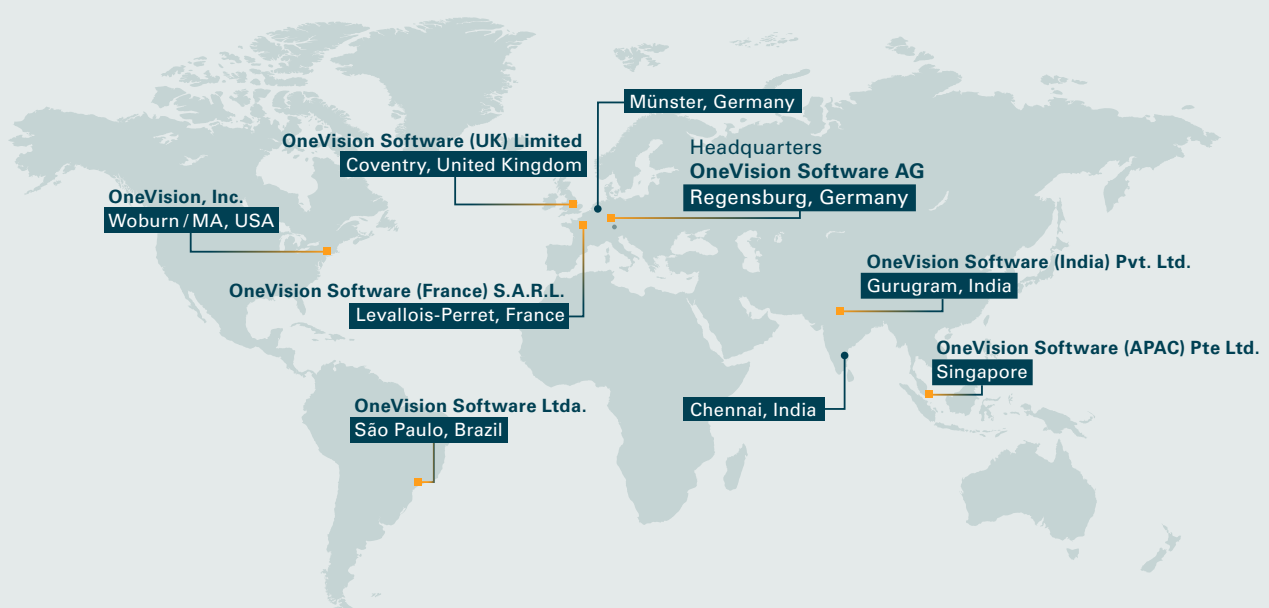

One step ahead with OneVision

International. Competent. Proven.

OneVision Software has been providing tailor-made automation solutions for 30 years. Our main goal is to help you achieve greater profitability and efficiency in your production processes. Our intelligent automation software is used around the clock by over 3,000 print service providers, media companies, agencies and publishers worldwide.

Service worldwide

As a global company, the OneVision team takes care of your concerns in multiple locations worldwide. In addition to the company headquarters in Regensburg and the development centers in Münster and Chennai, OneVision has subsidiaries in the United Kingdom, France, the United States, Brazil, Singapore, and India.

Give your processes
the decisive
automation boost

Your benefits with OneVision Software

MANAGING DIRECTOR

Addressing the gap of skilled workers

By using innovative software, your employees can focus on valuable tasks. Routine tasks are fully automated.

Throughput increase

Process automation increases machine utilization and throughput. This makes production significantly more profitable.

PRODUCTION MANAGER

Automation

Up to 100 % automation for your production. It is also possible to automate individual steps or to add checkpoints.

Quality and reliability

Greater production reliability with a concurrent increase in quality – 24 hours a day, 7 days a week.

WORKFLOW MANAGER

Modularity

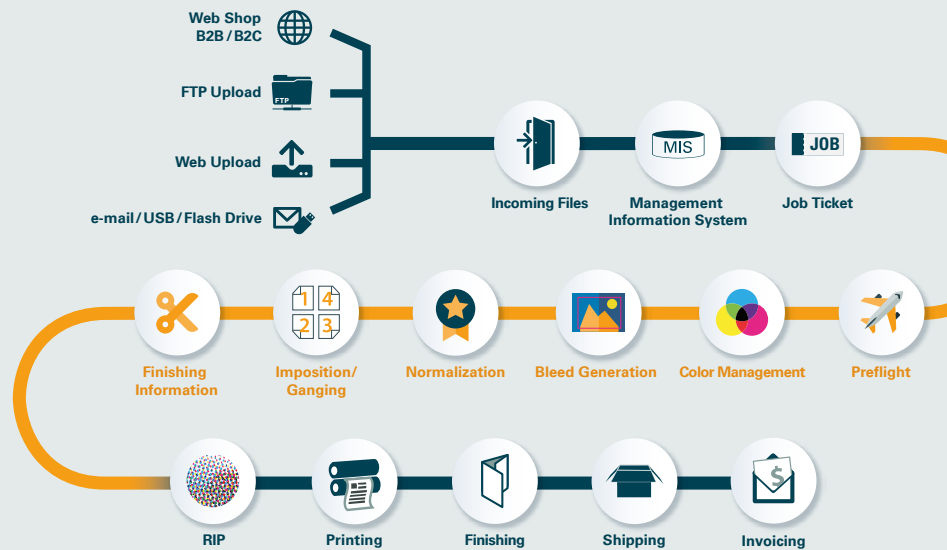

The modular design of OneVision's software solutions allows you to configure them to meet your specific needs.

Service

Consulting, software training, qualitative 24/7 support – all this is a matter of course at OneVision.

WORKFLOW AUTOMATION your way

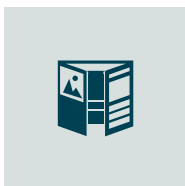

Processing and optimization of production files – automated: Intelligent assembly lines process your data individually. File optimization based on more than 130 check criteria. Identified errors are automatically corrected. The result: an optimal production file and customized information for finishing.

Software for automated processes

Get the most out of your processes with the intelligent technologies of the OneVision software solutions. The modular structure of the software enables individual configuration – tailored to your specific requirements. Sustainable print form creation (nesting, impositioning,

etc.) ensures significant savings in throughput time and printing material. Numerous integrations with hardware and software systems create a smooth production workflow that can be monitored quickly and transparently in real time thanks to job tracking.

Excellent service

Hand in hand: automated

To be able to provide customized software products, we want to understand our customer's processes – after all, your requirements are as individual as our software. In cooperation with you, our automation experts analyze your existing production and define where and how the OneVision automation software can be effectively integrated to make your workflow more profitable.

24/7 Support

After successful software implementation, our in-house helpdesk team is ready to assist you with various service levels. The workflow specialists are your contacts around the clock for any questions, configurations, updates and much more.

“OneVision listens to its customers – the support team is very responsive and allows us to move forward on various issues.”

François Leleu, Development Engineer at Oxy

Our services at a glance

Workflow Audit & Proof of Concept

To understand your requirements in detail, we dive deep into existing processes together with you. Based on this, you will receive an automated workflow you can test.

Training

A comprehensive training portfolio is available on an ongoing basis. Through individual training – in person or remote – you will become a software expert.

Customer portal

Our customer portal gives you direct access to the latest updates, detailed product manuals, extensive FAQs, direct connection to your OneVision contact and much more.

Updates

OneVision's software solutions have been developed continuously for 30 years. In this process, we respond to your requirements and the latest market developments.

Satisfied customers are our greatest joy

Diverse. Customized. Inspiring.

Our customer's requirements are as individual as the OneVision software. From big online printers and publishers to medium-sized companies and small businesses. Each one benefits

from the individual workflow automation. The result: optimized processes, significant time savings, increased quality and more profitability for long-term business growth.

A selection of our customers:

“Only OneVision can respond so individually to our problems and build workflows the way we need them. Everything else would not have made the profit for us as what we got from them now. Definitely.”

Jörg Scheele, Prepress Manager at Kleinhempel GmbH in Hamburg
