

# STATIONS

Production tracking  
and control

[www.onevision.com](http://www.onevision.com)

OneVision's Stations is your powerful tool for production tracking and control. The software maps all production steps in one system, from software systems involved, presses and finishing machines to manual work steps in postpress, finishing and commissioning.

## Get the digital overview

Transparent production processes

Stations provide a comprehensive and transparent overview and control of the production. All production steps are visualized in the software. You can map software systems, printing and finishing machines as well as manual work steps (such as eye-letting, picking, sewing, etc.) or analog

machines (e.g. Heidelberger Tiegel). A central overview allows you to track and control jobs in real time. Individual work instructions can be used to guide or inform operators through the various work steps. It is also possible to implement feedback and control functions for all individual jobs.

## Your benefits with Stations

### Managing Director

- ✓ Smart factory with digital production overview
- ✓ Time saving through automated digital job tracking
- ✓ Optimize your ROI and key figures with error analysis and performance tracking

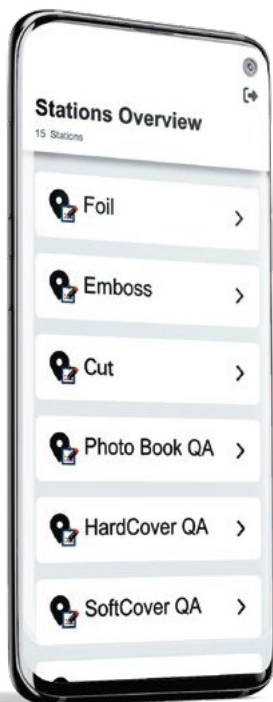

### Production Manager

- ✓ Quality control with feedback function
- ✓ Real-time tracking of all orders
- ✓ Integration of manual operations and analog machines

### Workflow Manager

- ✓ Guidance with digital instructions at each station
- ✓ Intuitive and transparent user interface
- ✓ All relevant information collected in digital system

## Stations App for your mobile devices

Stations come with a mobile app for tablet and smartphone. This allows you to control and handle your jobs quickly and easily with your iOS or Android device.

- ✓ Transparent overview of all orders at a station
- ✓ Job selection via order ID or integrated barcode scanning
- ✓ Direct instructions and feedback function on the mobile device
- ✓ Built-in photo function for quality control and documentation
