

PRESS RELEASE

OneVision showcases automation software at C!Print Lyon

Regensburg/Lyon. C!Print Lyon will take place from 3 to 5 February 2026. OneVision, a leading software manufacturer for process automation, will demonstrate its solutions and latest developments for wide format printing.

Automation for your wide format production

Wide Format Automation Suite combines an intelligent workflow management system with a comprehensive prepress package and tools tailored specifically to the needs of wide format printing. From job entry to printing and finishing, the solution offers maximum automation and reliability, with all tools customized for the special needs of the wide format segment. Find out more at booth 1B07 on how to produce more efficiently and error-free.

Greater efficiency with increased use of AI tools

The latest software update introduces a new AI interface that allows you to connect to ChatGPT, Gemini, and Mistral, among others. Designed to simplify workflows, this feature supports the processing of unstructured data, such as emails, and helps to automate recurring tasks.

Recently, OneVision also introduced its solution in the field of out-of-home campaigning: AI Billboard Validation. The automation solution for validating out-of-home campaigns with ease. The software performs AI artwork checking, which, together with the mobile app, provides instant proof of posting and automated feedback – keeping smooth communication between every stakeholder throughout the entire campaign journey.
