

## PRESS RELEASE

### OneVision Software to Exhibit at Graphics Canada 2025

**Woburn, MA / Toronto, Canada** – Canada's largest graphic communications and printing trade show takes place April 9–11, 2025. Automation expert OneVision will be at booth 5605 to showcase flexible automation software for various printing segments such as book, commercial, label and wide format printing.

#### Increased performance through automation

From order entry in the web shop, through automated file preparation, to press, finishing and production control, the software efficiently routes print jobs through the production process. Cutting-edge technologies for dynamic and automated print form creation (imposition, nesting, ganging) ensure more sustainable use of substrates.

Print service providers from a wide variety of print verticals, such as one of Canada's leading print manufacturers Cober, in-plant printing company Christus Health or large format printers 2CT Media and Phase3 have chosen to automate with OneVision software.

#### Smart factory with production tracking and batch management software

At Graphics Canada, OneVision will also showcase its latest solutions:

- **OneVision Stations:** With this solution, the entire production process can be digitally mapped and monitored. In particular, manual activities such as stitching, eyeletting, picking, etc., or machines without a digital interface can be directly integrated into the workflow. This helps print service providers reliably meet their service level agreements with their customers.
- **OneVision Workspace Production:** The software enables digital mapping of the entire machine workflow. The result is job bundles that can be produced together. Time-consuming machine changeovers are reduced and throughput is significantly increased.

The OneVision team welcomes visitors at Graphics Canada at booth 5605.

#### About OneVision Software AG

OneVision Software AG is an international software manufacturer for automation of production processes in the printing and publishing sectors as well as numerous other industry segments. For almost 30 years, the company's automation solutions have helped more than 3,000 customers worldwide to achieve greater profitability. As a globally active company, the OneVision Group comprises entities in Germany, USA, Great Britain, France, Brazil, Singapore and India.
