

PRESS RELEASE

ONEVISION AT PRINTING UNITED 2022: WORKFLOW SOFTWARE TO AUTOMATE AND FUTURE-PROOF PRINTING BUSINESSES

End-to-end automation from file input to printing, embellishment and finishing. Software manufacturer OneVision showcases the latest innovations of its modular automation solutions across a wide range of print segments at booth N2415. Live showcase highlight – a smart finishing process together with partner Kongsberg Precision Cutting Systems.

Las Vegas. The impact of automation in the printing industry can be transformational and has a massive impact on the all-important bottom line. With challenges such as labor shortages and increasingly high material and logistics costs, workflow automation is becoming more than ever a crucial key to success for print service providers to ensure sustainable business.

For nearly 30 years, automation expert OneVision has specialized in supporting print service providers around the world on this road to automation with powerful workflow software solutions.

One-Stop-Shop with OneVision technology

As so called middleware, OneVision's automation software meets the approach of a seamless connection between order entry, file preparation, print and finishing. The basis of the software is an extremely flexible, easy-to-use workflow management system that can be connected easily to any other parts of the system landscape. Through the seamless integration, incoming files pass automatically through classic file preparation steps. According to the specific requirements of the respective print segments (e.g. book, commercial, label, wide format printing) files get then optimally prepared for embellishment and finishing. Intelligent tools such as nesting/ganging, tiling and paneling, cut line management, bleed creation, impositioning, and much more ensure a substrate-saving and efficient downstream processing.

Software meets hardware: Automated file preparation and finishing

Attendees can also look forward to a live showcase besides software demos performed by OneVision workflow experts. In cooperation with Kongsberg Precision Cutting Systems, the benefits of automated digital finishing of various substrates will be demonstrated. A Kongsberg X24 cutting system will be installed in the booth.

This year's Printing United Expo 2022 takes place October 19-21 in Las Vegas and will be the most comprehensive printing event in the world. Bringing together over 500 exhibitors, it will be an excellent platform to experience new technologies. At OneVision's booth N2415 attendees will have the opportunity to learn more about tailor-made workflow software to streamline their production processes and realize a more economical print production.

About OneVision Software AG

OneVision Software AG is an international software manufacturer for automation of production processes in the printing and publishing sectors as well as numerous other industry segments. For almost 30 years, the company's automation solutions have helped more than 3,000 customers worldwide to achieve greater profitability. As a globally active company, the OneVision Group comprises entities in Germany, USA, Great Britain, France, Brazil, Singapore and India.
