

PRESS RELEASE

ONEVISION SOFTWARE AT HUNKELER INNOVATIONDAYS 2023

Tailor-made, integrated, highly efficient – at the international industry event for digital printing and finishing, automation expert OneVision showcases powerful automation software for a sustainable and future-proof production.

Regensburg/Lucerne. “Next Level Automation” – The motto of this year’s Hunkeler Innovationdays could not be more fitting for software manufacturer OneVision. A complete integration of company processes requires software solutions that can be smoothly integrated into existing system landscapes and individually configured. As a modular middleware, OneVision automates the entire production steps from file input to printing and embellishment as well as finishing – flexibly connected to existing hardware and software components.

Smooth integration into existing system landscape

Customer-focused cooperation with various MIS/ERP, press and finishing manufacturers enables an automation package tailored to the needs of digital printing companies. Photo book manufacturer Photoweb, print and media specialist F&W and many other print service providers rely on OneVision’s software solutions to streamline their production processes.

Towards an automated production with the “Road to Automation”

From 27 February to 2 March, the OneVision team invites visitors to join the “Road to Automation” at booth 501 and provides insights into how “Next Level Automation” can be achieved through an intelligent and integrated software solution that interacts with upstream and downstream systems.

About OneVision Software AG

OneVision Software AG is an international software manufacturer for automation of production processes in the printing and publishing sectors as well as numerous other industry segments. For almost 30 years, the company’s automation solutions have helped more than 3,000 customers worldwide to achieve greater profitability. As a globally active company, the OneVision Group comprises entities in Germany, USA, Great Britain, France, Brazil, Singapore and India.
